

## **1. Introduction**

OEL is committed to take all reasonable precautions, measures and provisions to manage security risks and preserving the security of data and technology infrastructure for both Office and the ship's in order to ensure safety, security, environmental protection and efficiency.

The more we rely on technology to collect, store and manage information, the more vulnerable we become to severe security breaches. Human errors, hacker attacks and system malfunctions could cause great financial damage and may jeopardize our Company's reputation.

## **2. Policy Elements**

- The Company understand that Cyber Risk Management has both safety and security aspects, emphasizing on managing the safety risks introduced by OT (Operational Technology), IT (Information Technology) and network.
- The Company understand that without appropriate technical and procedural risks protection and control measures, OT is vulnerable to disruption effecting the safe operation of ship and protection of the environment.
- To continuously improve cyber security systems, procedures, training, and security awareness of employees both ashore and on board
